

SAI RAM POLISETTY

Guntur, Andhra Pradesh, India

+91-7032992512 | sairampolisetty6@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Profile Summary

Software Engineer with experience building responsive web applications using React.js, JavaScript, HTML, CSS, and REST APIs. Skilled in developing scalable frontend solutions, integrating backend services, and collaborating through Git-based workflows. Familiar with cloud fundamentals through AWS EC2 and IAM. Strong problem-solving abilities with hands-on experience in data structures and algorithms.

Technical Skills & Tools

- **Frontend:** React.js, Next.js, Tailwind CSS, Bootstrap, JavaScript(ES6+), HTML5, CSS3
- **State Management:** React Hooks, Component State, Context API
- **Backend:** Node.js, Express.js
- **APIs:** REST APIs, Axios, Fetch, Async/Await
- **Databases:** MongoDB, MySQL, PostgreSQL
- **AI/Concepts:** Retrieval-Augmented Generation (RAG), LangChain
- **Tools:** Git, GitHub, Postman, Jupyter Notebook
- **Deployment:** Vercel, Netlify, Render
- **AWS:** IAM, EC2, S3, Databases

Experience

AARO7 Fintech Pvt. Ltd. - CarArth Platform

Jan 2026 - May 2026

Frontend Engineer Intern

- Developed reusable React components using hooks, improving UI scalability and reducing code redundancy
- Implemented real-time search functionality, improving user interaction speed and filtering efficiency
- Designed responsive UI layouts using Tailwind CSS, enhancing usability across multiple devices
- Integrated REST APIs and handled asynchronous data fetching to ensure smooth data flow and performance
- Collaborated on implementing Retrieval-Augmented Generation (RAG) features for intelligent data retrieval and enhanced user query responses
- Improved SEO performance by optimizing page structure, metadata, and frontend rendering, contributing to better search visibility and indexing
- Used Git and GitHub for version control and collaborative development workflows.

Projects

ImagineZY - Full Stack AI Image Generation Platform | *HTML, Tailwind CSS, React.js, Node.js, MongoDB, Clerk, Express.js, Cloudinary* — [View Website](#) [GitHub](#)

- Developed and deployed a full-stack AI image generation platform with authentication, image management, and responsive UI.
- Integrated secure authentication using Clerk and implemented REST APIs for image CRUD operations
- Designed scalable database models and implemented user-based filtering for personalized and community feeds
- Optimized frontend performance and responsive UI using Tailwind CSS

WikiQuizAi - Full Stack AI-Powered Quiz Generation Platform | *Python, FastAPI, LangChain, LLM Integration, MySQL, backend pipeline, React, BeautifulSoup, REST API* — [View Website](#) [GitHub](#)

- Developed an AI-powered quiz generation system using React, FastAPI, LangChain, and LLM Integration
- Integrated REST APIs to fetch quiz data dynamically and managed asynchronous state updates for smooth rendering
- Designed clean and modular component layouts for difficulty tagging, quiz regeneration, and modal-based viewing in the frontend

Education

Narasaraopeta Engineering College

Expected Graduation: May 2026

B.Tech in ECE

CGPA: 8.2/10 (Till Current Semester)

Extracurricular / Leadership

Teaching Assistant

April 2024 – Dec 2025

- Mentored 1100+ students through coding challenges and project development.
- Founded and led an English communication group with 250+ active members.
- Solved 180+ Data Structures and Algorithms problems on LeetCode and coding platforms.
